

BusyBugs 'make your own' barn

It's easy to make your own barn to house your Busy Farmer's animals.

Grab a box and get your BB to help you give it a quick paint. Cut out a window and some big double doors. We used white-out to trim the doors and window to give them a farm feel!

An opening roof (or no roof at all) is perfect for easy access to the animals inside.

Make the inside nice and comfortable for the animals by using shredded paper, wool or material to make hay.

Small plastic containers are perfect for beds and food troughs. Rice, barley and lentils make great food for the animals.

Some blue felt as a pond for the ducks, and some brown satin mud for the pigs will finish your farm off perfectly!
